The safer **Bitcoin** wallet that puts **you** in control

Create your Wallet

Click Login

Improved security

Protect your bitcoins with both your key and ours, set spending limits, rate limit transactions and always be the only one in control

Quick login

You can easily login in 'watch-only mode' via custom login without compromising security or privacy

Scroll to read more

Bitcoin is the currency of the future

We don't make you choose between security and convenience. And we don't compromise your privacy.

Our **per-transaction** two factor authentication, multi-signature and deterministic wallet allow you unprecedented control over your transactions.

And, we **never** store your private keys, not even encrypted. At the same time we make it trivial to view and transfer your funds.

Take control of your future now, at GreenAddress.

Step 1 of 3

You are now the proud owner of a bitcoin wallet

Please finish this 4-step account setup to fully secure it against intruders

Your mnemonic passphrase

only steel immune rocket ginger devote insane crisp genre hello slush adult siren decline bar fall execute jar market uniform arrest hurry work profit

Please write down these words and store them in a safe place as they can't be recovered. **We do not store the above information anywhere, we can't help you recover it!**

☐ *I confirm that my passphrase is saved & secured and I agree with the Terms of Service*

Show QR Code   Continue

Copy the code phrase it will still need

Click confirm

And click continue

You have no two factor authentication set up. Please set it up in settings.

You have not verified that you

Please enter the missing words from your mnemonic:

(to verify that you backed it up correctly)

Word #1	steel	immune	rocket	Word #5	devote	insane	crisp
genre	hello	slush	adult	siren	decline	Word #15	fall	execute
jar	market	Word #20	arrest	hurry	work	profit

Cancel and return to first step   **Verify**

To issue a transaction you will not only need to login to your wallet but also confirm it via two factor authentication.

Continue

Here you need code phrase, fill in the missing phrases

You have no two factor authentication set up. Please set it up in settings.

You have not verified that you...

Please enter the missing words from your mnemonic:

(to verify that you backed it up correctly)

only   steel   immune   rocket   ginger   devote   insane   crisp

genre   hello   slush   adult   siren   decline   bar   fall   execute

jar   market   uniform   arrest   hurry   work   profit

Cancel and return to first step   Verify

To issue a transaction you will not only need to login to your wallet but also confirm it via two factor authentication.

When everything is ready, click verify

WARNING You have no two factor authentication set up. Please set it up in settings.

Step 2 of 3

# Don't compromise on security

Set up two factor authentication

| Email | Google Authenticator | SMS | Phone |

Your email address   info@_____   [Enable]

We recommend setting up multiple two factor authentication methods to allow backup access to your funds in case any of your two factor become unavailable.

To issue a transaction you will not only need to login to your wallet but also confirm it via two factor authentication.

[**Continue**]

Fill email field and click the Enable button.

WARNING You have no two factor authentication set up. Please set it up in settings.

Step 2 of 3

Don't compromise on security
Set up two factor authentication

| Email | Google Authenticator | SMS | Phone |

You need to provide one code from your email to set up the two factor authentication. Please open your email and provide the code.

Email code   ••••••   Enable   **Cancel**

We recommend setting up multiple two factor authentication methods to allow backup access to your funds in case any of your two factor become unavailable.

To issue a transaction you will not only need to login to your wallet but also confirm it via two factor authentication.

Continue

Your email will receive a confirmation letter with the code you need to enter in this field. After press continue.

Fast and secure access to your Wallet

To have a secure but quick access from this device set your PIN

PIN number   4-15 digits number

Access by PIN allows a quick login while keeping security to a high standard. The PIN secures a random AES 256 bit password which we will delete if 3 PIN attempts fail, forcing you to provide your full mnemonics once again. Easy, convenient and secure, so let's use it!

Take me to my wallet and skip all this!

Skip PIN setup and continue

Come up with a pin code
