2. INTRODUCTION

The TTFX Multi Agent Commission tool allows you to allocate agent commission by points or money to an unlimited number of agents or sub-IB's.

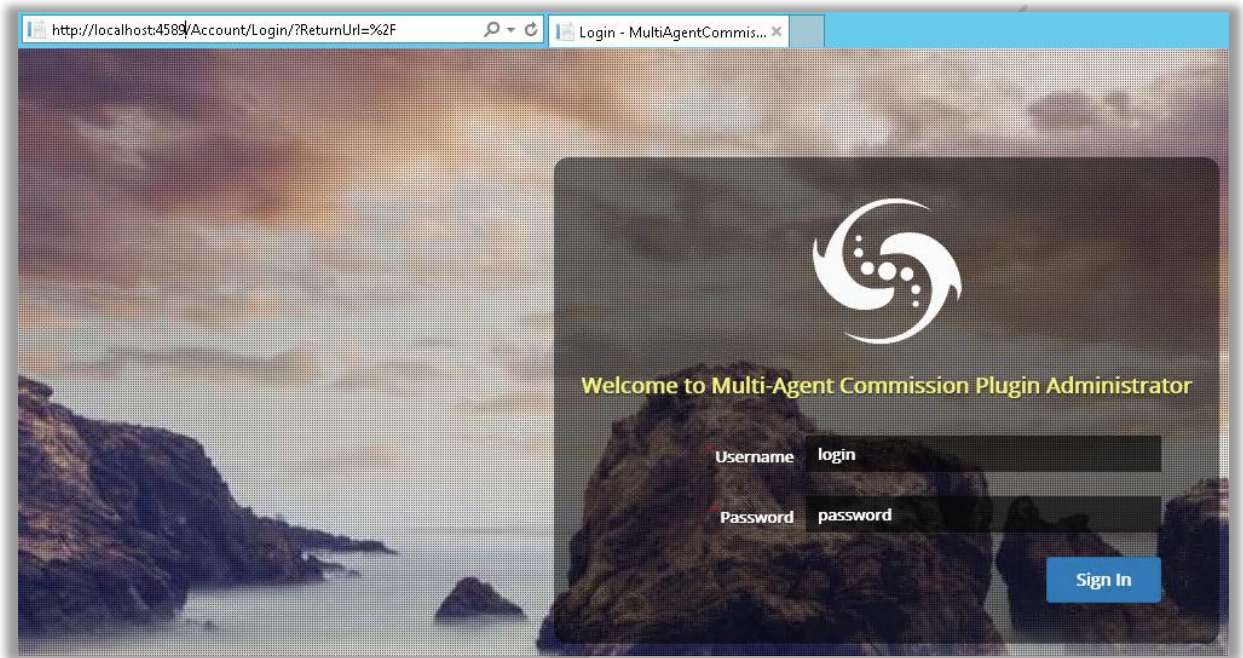

The Custom GUI allows any employee to be able to set the agent commission without a confusing config file.

TradeTools

3. INSTALLATION

To install Multi Agent Commissions plugin to your MT5 server:

- Run MultiAgentCommissionPlugin.MT5.Setup.1.0.exe
- Install plugin to your MT5 server folder.
- Add Multi Agent Commissions plugin to list of installed plugins
- Connect to Multi Agent Commissions plugin via any web browser using IP address (<http://localhost:4589>) of your mt5 server and manager account login and password

4. DESCRIPTION

Any settings are updated using the “Multi Agent Commission Plugin Configuration” without requiring an MT5 server restart. You can set several filters using groups / accounts and or symbols. This tool uses very little server resources since it is installed as an MT5 server API plugin.

The Multi Agent Commissions tool allows a broker to distribute spread commission between your introducing brokers and affiliate agents with maximum flexibility compared to standard setup offered via MT5. The flexibility is demonstrated by the ability of a broker to spread commissions to any number of agents based on position symbol, account group and account number. The size of commission can be set in % or in points from trade size. The Multi Agent Commission tool provides a broker an easy and effective solution for commission management. You can set Agent account values for group of accounts.
